

HKUST MSc Program in Artificial Intelligence

ARIN 6900 Capstone Project Proposal

Fengshuo Yang/21216054

January 2026

1 Project Information

- (a) **Title:** Enhancing large language model (LLM) ethics
- (b) **Supervisor:** Prof WANG Shuai
- (c) **Expected goal:** To improve LLMs' behavior and reduce harmful outputs.

2 Methodology

The methodological approaches to be adopted are as follows:

- (a) **Baseline evaluation on LLM to quantify its ethical risk performance**
- (b) **Implement Reinforcement Learning based on human feedback**
- (c) **Identify model biases across various dimensions**
- (d) **Explain the inside logic of the model's generation of ethically risky outputs.**

3 Project planning

- (a) **Timeline**
 - February 9, 2026 – Project proposal
 - May 29, 2026 – Interim report
 - July 31, 2026 – Final report
- (b) **Possible reference information:** ethical scenario datasets (e.g., harmful content, bias, privacy breaches, etc.)
- (c) **Possible project outcomes:** a report on the ethical performance of LLMs ; large language model outputs with enhanced ethical guardrails
